

GCSE Choices 2020-22

PUTNEY
HIGH SCHOOL
GDST

INTRODUCTION by Mrs Suzie Longstaff, Headmistress

This guide is designed to help you make informed choices as you select the GCSE options that you will study for the next two years. Some of you may already have a clear idea of your likely choices, whilst others will be considering how best to decide between the options that are available. In either case, with the help and support from your teachers at Putney High School and your parents, I am certain that you will feel confident in your choices, and that you will go on to succeed in these subjects at GCSE.

It is important to choose your subjects carefully, bearing in mind your own interests and strengths. At GCSE, you will study fewer subjects and have more periods for each one; this means that you begin to specialise more in those areas that you enjoy, and begin to study in more depth.

Inside this booklet you will find information on the GCSE courses offered from September 2020. Whilst you will have had the opportunity to study many of these before, you will also see that there are new subjects available including Physical Education, Computer Science and Classical Civilisation.

All pupils study a core of key subjects (English Literature and Language, three Sciences, Maths and a Modern Foreign Language), but we offer a free choice of 'option' subjects.

Choosing your GCSE subjects is undoubtedly a big decision, but whatever choices you make we will ensure that you have the support and guidance required to flourish as you embark on this exciting next step in your academic career.

CHOICES

You should choose four subjects **including at least one Modern Foreign Language** from those listed below. We advise that a Humanities and a practical/creative subject make a good balance. More than one Modern Foreign Language may be chosen and it is a great advantage if you are thinking about taking a degree in a foreign language.

The subjects you can choose from are as follows:

Art	
Chinese Mandarin	Classical Civilisation
Computer Science	Design Technology: Fashion & Textiles
Design Technology: Product Design	Drama
French	Geography
German	History
Italian	Latin
Music	Physical Education
Religious Studies	Spanish

Choices are made because it is necessary to reduce the number of subjects to be taken for GCSE, so they can be studied in greater detail and to help you develop your skills in certain areas.

You are able to choose four subjects (including at least one Modern Foreign Language) in addition to the compulsory subjects and the following points may help you in your decision.

- Which subjects am I good at, and which do I enjoy? (These are often the same)
- What is the content of the course? Do I like the syllabus?
- Which subjects do I know I definitely don't want to take?
- Are these choices my own personal decision?

We shall look at all the choices after the **return deadline** and, providing numbers are sufficient, arrange to make subjects available to as many girls as possible. However, if there are insufficient numbers to form a viable group then that course will not run.

There is a further opportunity to discuss option choices at the **Year 9 Progress Review Evening on Wednesday 15th January**. The form for indicating your choice is given at the end of this booklet. This should be given to your form teacher by **Monday 20th January**.

You will need to choose your subjects carefully and then work with enthusiasm and commitment. I am sure you will enjoy your GCSE studies!

James Mutton

Director of Curriculum Studies

YOU WILL CHOOSE FROM THE FOLLOWING OPTIONS:

The Core

English Language

English Literature

Mathematics

Biology

Chemistry

Physics

One Modern Foreign Language

Three from the following

Art

Chinese Mandarin

Computer Science

Fashion & Textiles

Geography

History

Latin

Physical Education

Religious Studies

Classical Civilisation

Drama

French

German

Italian

Music

Product Design

Spanish

You can choose an additional Modern Foreign Language if you wish.

THE NEW GCSE GRADING SYSTEM

New grading structure	Current grading structure
9	A*
8	
7	A
6	B
5	
4	C
3	D
2	E
1	F
1	G
U	U

GOOD PASS (DfE)
5 and above = top of C and above

AWARDING
4 and above = bottom of C and above

You may be aware that GCSEs have changed. The main changes are as follows:

- A grading system of 1 to 9 (with 9 being the highest)
- Less controlled assessment than before in most subjects
- More emphasis on terminal examinations rather than modular examinations
- Early entry for examinations is now not encouraged.
- In Government league tables new measures have been introduced and the IGCSE will not count towards them

The most noticeable difference for pupils and parents is the new grading system. In the first instance the number of pupils awarded a 4 has been pegged against those who would normally receive a C. Similarly, the number receiving a 7 broadly matched previous A totals. Then a formula calculates the amount of 8/9 grades awarded, but roughly 60% of the number who previously received an A* will get the new level 9.

SOURCES OF INFORMATION

- **The Careers Area in the Sixth Form Centre** – Ms Alakija is Head of Careers and you can make an appointment to see her.
- **Your Head of Year** – Mrs du Toit
- **Director of Curriculum Studies** – Mr Mutton
- **Parents** – will be helpful but remember it is **your** choice.
- **Publications** – There is a variety of useful books and publications in the Careers Area on the ground floor of the Sixth Form Centre. You are most welcome to use these books for reference.

All Year 9 pupils will receive help with their GCSE choices during PSHE from their Form Tutor, Head of Year and Careers team.

CAREERS GUIDANCE

- Putney is a member school of ISCO (the Independent Schools Careers Organisation) and all our pupils from Year 10 upwards are enrolled with ISCO. They are members until the age of 23 and the cost of enrolment is included in the school fees. ISCO provides a range of services including careers guidance and careers experience course.
- In May, Year 10 pupils take the ISCO Morrisby test as part of their enrolment. This is a psychometric aptitude and ability test which produces an objective personal profile highlighting strengths, weaknesses and aptitudes. It suggests career areas for consideration and ISCO representatives do follow up group sessions with the girls. This is helpful in choosing A Level courses, Higher Education courses and extending career knowledge.

Core Subjects

ENGLISH LANGUAGE

Board and specification followed: Cambridge IGCSE First Language English 0990. We have investigated all possibilities to make sure students have a demanding and enjoyable curriculum. We are continuing to teach IGCSE, but this new course awards grades on the 9-1 scale.

Course Outline

The course is directed towards two main assessment objectives: Reading and Writing. These areas are taught alongside each other, although also tested separately, and there are echoes of the course requirements in the English Literature syllabus.

Reading requires the candidate to:

Read with insight and engagement, making appropriate references to texts and developing and sustaining interpretations of them; distinguish between fact and opinion and evaluate how information is presented; follow an argument; select material appropriate to their purpose and summarise concisely; understand, and evaluate, how writers use linguistic, structural and presentational devices to achieve their effects.

Writing requires the candidate to:

Communicate clearly and imaginatively, using and adapting forms for different readers and purposes; organise ideas into sentences, paragraphs and whole texts, using a variety of linguistic and structural features; use a range of sentence structures effectively with accurate spelling and punctuation.

Method of Assessment

Examinations: two written examination papers, each of two hours in length and eligible for grades 9-1.

Paper 1: Reading, 50% of total marks

Paper 2: Directed Writing and Composition, 50% of total marks

SPOKEN LANGUAGE ENDORSEMENT

This is a standalone qualification; it is no longer part of the Language IGCSE. Candidates are expected to talk for no more than 10 minutes on a topic of their choice and respond to questions. They are awarded a Pass, Merit or Distinction.

ENGLISH LITERATURE

Board and specification followed: Cambridge IGCSE Literature in English 0992

Course Outline

The course for English Literature encourages students to explore their literary interests and to learn the skills necessary for literary study. This new course awards grades on the 9-1 scale.

Candidates are given the opportunity to respond to texts critically, sensitively and in detail, selecting appropriate ways to convey their response, using textual evidence as appropriate. They will explore how language, structure and form contribute to the meanings of texts, considering different approaches to texts and alternative interpretations. They will consider relationships and comparisons between texts, selecting and evaluating relevant material. They are encouraged to develop an awareness of social, historical and cultural contexts and their influence on the study of literature.

Method of Assessment

Preparatory tasks set on a variety of texts and topics lead to three final examinations: one with a closed-book question on prose and a question on studied poetry, one open-book drama paper and the other requiring students to consider passages of poetry or prose not previously studied.

We use a variety of literature – both set texts and enrichment texts – to prepare students for the final examinations. At present, Year 11 are studying a selection of poems from the Cambridge IGCSE anthology. They are also reading *Macbeth* and *Nineteen Eighty-Four*. Various styles of tasks and enrichment texts will prepare students for their examinations in Year 11 and allow them to practise examination skills (tasks will usually cover character, theme and detailed textual analysis). It will also give them experience of a range of texts written in English. All texts will offer opportunities at the start for students to practise the analysis of unprepared material, required by the third examination where literary critical skills are tested.

In Year 10, students have the opportunity to write on a topic of their choice linked to language or literature. They will give a presentation that will be marked for spoken language. This will allow students the chance to pursue independent interest.

MATHEMATICS

Board and specification followed: Mathematics Edexcel International IGCSE

Course Outline

The three assessment objectives of this specification are:

AO1: demonstrate knowledge, understanding and skills in number and algebra:

- numbers and the numbering system
- calculations
- solving numerical problems
- equations, formulae and identities
- sequences, functions and graphs.

AO2: demonstrate knowledge, understanding and skills in shape, space and measures:

- geometry
- vectors and transformation geometry.

AO3: demonstrate knowledge, understanding and skills in handling data:

- statistics.
- probability

The weighting in the examination of the above assessment objectives is 60%:25%:15%

The course builds on and extends ideas met in Years 7 to 9, and includes more complex work on: number, algebra, geometry, measures, probability and statistics. Included in the IGCSE syllabus are also the topics of Calculus, Set Theory and Functions which give good preparation for A Level.

The course is designed to develop the students' mathematical knowledge and oral, written and practical skills in a manner that encourages confidence. In all topic areas they will solve problems, learn to devise strategies and present their solutions clearly, and check and interpret the results. They will also develop the ability to reason logically, to classify, to generalise and begin to work on how to produce rigorous proofs. We also hope to develop their ability to apply mathematics in other subjects, particularly in Science and Technology.

Students in the two highest sets, which work at a faster pace, will have the opportunity to explore harder topics beyond GCSE in Year 11. It is our intention to prepare them for Additional Mathematics (OCR).

Method of Assessment

There are two tiers of entry at GCSE – Higher and Foundation. We expect all students at Putney High School to sit the higher tier which allows them to achieve grades 9 - 4. Assessment is by two written examination papers, each of two hours in length. In both papers the use of a calculator is allowed.

There is no controlled assessment involved with this course.

ADDITIONAL MATHEMATICS

Board and specification followed: Additional Mathematics OCR Free Standing Mathematics Qualification

Course Outline

The subject content of OCR Additional Mathematics takes the ideas met in the IGCSE and expands them further in preparation for studying this subject at A Level. It is the modern day version of the O Level (Alternate) paper.

Many of the students will go on to study AS and A Level courses, and for these the FSMQ provides an introduction to the subject at that level, with the possibility of subsequent accelerated progress into Further Mathematics.

There are others who will not continue with Mathematics beyond Year 11, and for these students this unit provides a worthwhile and enriching course in its own right.

The content consists of four areas of Pure Mathematics:

- Algebra;
- Co-ordinate Geometry;
- Trigonometry;
- Calculus.

Each of these is used to support a topic from a recognised branch of Applied Mathematics.

Pupils in the two top sets, which work at a faster pace, will have the opportunity to explore harder topics beyond GCSE in Year 11. At present they take the above qualification but we will always ensure the pupils take the best possible qualification to both stretch and prepare them for post-16 education.

Method of Assessment

The assessment is by examination and will be set in summer of each year. There will be one paper of two hours. The examination result will be reported as a grade A, B, C, D, E or U.

There is no controlled assessment involved with this course.

The first section of the paper is worth 50 marks and contains shorter answer questions, normally in a non-contextual format.

The second section contains four longer length questions, worth 50 marks in total.

SCIENCE

Board and specification followed: Edexcel IGCSE Science

Course Outline

In Year 9 we begin the Edexcel IGCSE qualification that will lead to three GCSEs in science. This is a rigorous course that forms an excellent foundation in the Sciences for further study at A Level, and provides the scientific literacy necessary to thrive in a technological age. All students will take separate examination papers at the end of Year 11 in Biology, Chemistry and Physics leading to three separate GCSEs. There is no coursework associated with the examinations, although practical work will form an integral part of the teaching of the topics covered.

The assessment objectives and specification sections for IGCSEs in science are:

AO1 Knowledge and understanding (40%)

AO2 Application of knowledge and understanding, analysis and evaluation (40%)

AO3 Experimental skills, analysis and evaluation of data and methods (20%)

Biology:

Section 1: The nature and variety of living organisms

Section 2: Structures and functions in living organisms

Section 3: Reproduction and inheritance

Section 4: Ecology and the environment

Section 5: Use of biological resources

Chemistry:

Section 1: Principles of chemistry

Section 2: Inorganic chemistry

Section 3: Physical chemistry

Section 4: Organic chemistry

Physics:

Section 1: Forces and motion

Section 2: Electricity

Section 3: Waves

Section 4: Energy resources and energy transfers

Section 5: Solids, liquids and gases

Section 6: Magnetism and electromagnetism

Section 7: Radioactivity and particles

Section 8: Astrophysics

Method of Assessment

Two written papers for each science in Year 11 (six papers in total)

Paper 1: 2 hours, 110 marks (61.1% of total qualification marks)

Paper 2: 1 hour 15 minutes, 70 marks (38.9% of total qualification marks)

MODERN FOREIGN LANGUAGES

Board and Specification followed: AQA for **MANDARIN CHINESE, FRENCH, GERMAN,** and **SPANISH**. We will also be offering **ITALIAN** (Cambridge IGCSE) to those pupils who have been following the course in Year 9.

Course Outline

The aim of all language courses is to develop the ability to use the modern foreign language effectively for the purpose of practical communication and cultural understanding. Pupils develop the four skills of reading, writing, speaking and listening, which are taught in the context of cultural topic areas and through the use of many different types of media. We emphasise the importance of understanding grammar so that pupils develop the skills to express their own ideas creatively and to become confident, independent language learners. Developing practical language skills is a central focus of the GCSE, but the skills of reading, writing, speaking and listening are developed in the context of topic areas such as: Identity and Culture and Local, National, International and Global Areas of Interest. Through developing these four skills, pupils will be able to understand and respond to spoken and written language, communicate and interact in writing and speech and thus gain a firm grasp of vocabulary and grammar, as well as the skills needed to continue their language learning in the future. Pupils' language learning is further enhanced by the opportunity to explore aspects of film and literature of the countries whose languages they are studying. As well as developing comprehension and text writing skills, pupils begin to develop skills in translating both to and from the target language. A number of language trips are offered to encourage pupils to go abroad to practise their language skills as well as to gain an invaluable experience of the culture.

Method of Assessment

All skills are examined at the end of Year 11 and pupils will sit the following papers: Listening, Speaking, Writing, and Reading (each worth 25% of the GCSE).

Pupils currently following the Bilingual Programme in French, German, Mandarin, Spanish and Italian should expect to take their GCSE early in Year 10 (through continuing lessons at lunchtimes) and should therefore still make a choice of at least one MFL in addition to their bilingual language(s) at GCSE.

Option Subjects

ART

Board and Specification followed: Art & Design (Art, Craft & Design AQA 8201)

Course Outline

The aim of GCSE Art is to engender a genuine love of art, to inspire and build confidence in every pupil, wherever their strengths and talents lie. All pupils develop work using a wide range of materials and experiment with practical skills in fine art, sculpture and photography. The Art, Craft and Design course encourages self-motivation, curiosity, and a strong visual awareness. Each project has relevant and stimulating contextual references to support developing ideas and underpins the pupil's own practice. Some focus on drawing and clearly written annotation is fundamental to the course. In Year 10 emphasis is on developing foundation skills, giving pupils the opportunity to build up skills through experimentation and development in a variety of disciplines. There is a strong emphasis on creativity through the delivery of two exciting main projects. In Year 11 pupils are given further independence and are encouraged to explore individual ideas and particular areas of interest. Visits to galleries are an important part of the course, including trips to the V&A, Saatchi Gallery, Tate Britain, Tate Modern, and Kew Gardens.

Method of Assessment The GCSE Art and Design course consists of two components:

1) Coursework (Portfolio) 60%:

Work in Year 10 is developed through wide-ranging and varied ideas and media. The project themes are *Japan Mixed-Media* and *Natural Form Sculpture* projects. The Year 10 Summer mock examination is incorporated into the second project. Critical and contextual studies inform all work as projects progress. Experimentation, recording and planning for personal final works are vital and integral to each project. In Year 11, the projects are completed and reviewed to make sure all work is up to a high standard. There will also be an additional Year 11 Extended Personal Project with Mock and 5 hours moderated studio time (in examination conditions); This project will help prepare students for the Externally Set Assignment process: Unit 2, as well as completing additional high quality work for assessment.

2) Unit 2 Externally Set Assignment 40%:

The Externally Set Assignment question paper is distributed in January. Pupils choose the question they will develop with a preparation period of up to 12 weeks. There are 10 hours of moderated time (in exam conditions in the Art studios) before the end of the Spring term. All work is moderated and marked internally with further external moderation by AQA. A GCSE Art exhibition takes place in school in June.

CLASSICAL CIVILISATION

Board and Specification followed: Classical Civilisation OCR J199

Course Outline

There are two main areas of study, each worth 50% of the marks available at GCSE.

Myth and Religion

Greek and Roman religious beliefs and practices are the main focus. You will study myths about the gods and the foundation myths of the cities of Rome and Athens. There will be a mixture of literary sources, such as Ovid's *Metamorphoses*, Virgil's *Aeneid* and the Homeric hymns, and visual art, including the friezes of the Parthenon and Rome's Ara Pacis.

The Homeric World

This paper offers the opportunity to study a blend of literature and archaeology. Homer's famous epic poem, *The Odyssey*, is our main focus with its tales of monsters, witches and romance. You will also study some key sites of the Mycenaean period in which the poem was set including Mycenae itself and Troy.

Pupils will gain an excellent understanding of these two hugely influential civilisations through literature, art, archaeology and other evidence. As well as factual recall, the course encourages pupils to develop their analytical skills and their ability to present a cogent argument on any number of topics. They will also hone their ability to read, understand, appreciate and respond to a range of classical literature in translation.

Method of Assessment

There are two written examinations at the end of Year 11. Each is worth 50% of the marks available and will take the shape of a 90-minute paper.

COMPUTER SCIENCE

Board and Specification followed: OCR GCSE Computer Science

Course Outline

This GCSE will give you a real in-depth understanding of how computer technology works. You will learn about how computers operate whether they are in laptops, mobile phones, or other devices; learn what is behind the websites you use every day; learn how to program in the C# programming language; acquire and apply creative and technical skills in a range of contexts; evaluate the usefulness of computer solutions and their impact on society.

Computing is of enormous importance to today's society. Computers are widely used in all aspects of business, industry, government, education, leisure and the home. In this technological age, a study of computer science, and particularly how computers are used to solve problems, is essential to future work in almost all fields. Computer Science demands both logical discipline and imaginative creativity in the selection and design of algorithms and the writing, testing and debugging of programs; it encourages an awareness of the management and organisation of computer systems; it extends learners' horizons beyond the school or college environment in the appreciation of the effects of computer science on society and individuals.

During the course, you will develop your understanding of the main principles of problem solving using computers. A substantial part of the course is hands-on. You will develop computer-based solutions to practical problems using a high-level programming language including being able to effectively test these solutions. The course will also give you an appreciation and understanding of how mobile applications, social networking sites and games are created in the real world.

Specification Content

Computer Systems: You will learn about the fundamentals of computers: their architecture, hardware, cyber security and networking.

Computational thinking, algorithms and programming: You will create, analyse and correct algorithms and processes. You will learn how the underlying processes behind real-world software operates.

Programming project: You will be given a practical problem, and will design a solution to this using the C# programming language. You will write a report for your program, including sections on design and testing.

Method of Assessment

Unit 1: Understanding Computer Science written exam: 1 hour 30 minutes – 50%

Unit 2: Computational Thinking, algorithms and programming exam: 1 hour 30 minutes – 50%

Unit 3: Software Development (programming project): 15 hours - 0% **

*** non-assessed mandatory unit submitted to the board - no contribution to the final GCSE grade.*

DRAMA

Board and Specification followed: Drama Edexcel

Course Outline

The Drama course enables you to develop practical skills and be inspired, moved and challenged by studying a broad and worthwhile course of study. You will work imaginatively and creatively in creating both devised work and interpreting written texts into performance. You will also develop skills of being a director and theatre practitioner by exploring how you would approach performance text in rehearsal and by reviewing the effectiveness of live theatre that you will see.

Specification Content

Component 1: Devising

Create and develop your own original piece of devised theatre from a stimulus.

Give a performance of this devised piece.

Analyse and evaluate the devising process and performance.

Component 2: Performance from Text

Students will perform in two key extracts from a performance text – each group (between 3 and 6 students) will study one play to then bring to performance.

Teacher support will be given to all students in rehearsal.

Component 3: Theatre Makers in Practice

Practical exploration and study of one complete performance text, *The Crucible* by Arthur Miller

Live theatre evaluation – free choice of production.

Method of Assessment

Component 1: Internally assessed and then externally moderated. (Worth 40% of qualification)

There are two parts to the assessment:

1. A portfolio covering the creating and developing process and analysis and evaluation of this process (45 marks) – this can be a combination of a practical presentation and written document.
2. A devised performance (15 marks) – this will be videoed and assessed internally

Component 2: Externally assessed by a visiting examiner. (Worth 20% of qualification)

Performance covering both key extracts is worth 48 marks.

If two separate performances are done covering two key extracts, then each performance is worth

24 marks.

Component 3: Written examination – 1 hour and 30 minutes (Worth 40% of qualification)

Section A: Bringing Texts to Life

45 marks - this section consists of one question broken into six questions (short and extended responses) based on one extract from *The Crucible*. Performance texts are not allowed in the examination as the extracts will be provided.

Section B: Live Theatre Evaluation

15 marks - this section consists of two questions requiring students to analyse and evaluate a live theatre performance they have seen. Students are allowed to bring in theatre evaluation notes (500 words).

FASHION and TEXTILES

Board and Specification followed: OCR GCSE Textiles Design

Course Outline

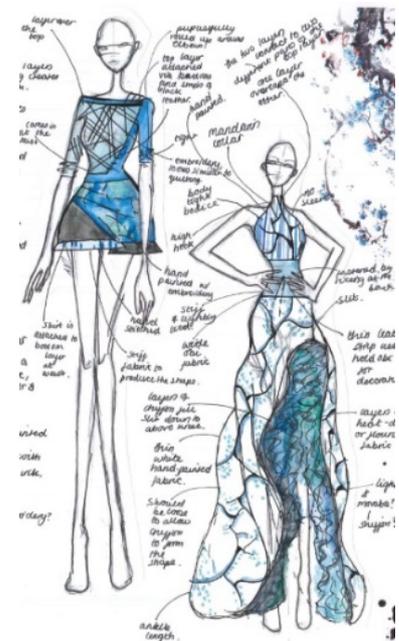

Textile design covers a broad range of skills from woven and knitted textiles to stitched or printed fabrics. Encouraging students to develop their technical knowledge helps them understand how fabrics will behave and react to different processes. When creating final pieces for fashion, interiors or textile art, this technical knowledge enables pupils to make judgments on how a piece should be made and what techniques can be combined together to give the best finish. The course places much emphasis on creativity, with investigative and design work being completed in sketchbooks, much as it is within further education.

Method of Assessment

This GCSE has a controlled assessment unit, which involves producing a portfolio of work in a supervised environment - this could be in the classroom or, for example, on a field trip. There is also a 10-hour practical task (for which you will have preparation time).

Co-curricular Opportunities

Students visit exhibitions and take part in inspirational trips, both in London and further afield, such as to Paris. They gain advice and work on projects set by professionals working in Fashion and Design, with the students' garments displayed in Putney's biannual fashion show.

GEOGRAPHY

Board and Specification followed: AQA (9-1) 8035

Course Outline

In our global society, it is more important than ever that we have a sound understanding of the relationships between people and the environment. Geography is a subject that encompasses a broad range of contemporary issues and challenges, and is therefore highly valued by universities and employers alike. It suits students with an enquiring mind and an interest in exploring the world around them.

Fieldwork is an integral part of the curriculum; there is a residential trip to Dorset in Year 10, a day trip in Year 11 and the opportunities to take part in expeditions to the Azores and Iceland.

Specification Content

Physical topics:

- As part of Landscapes and Physical Processes, we will look at how various landscapes are formed including rivers and coasts.
- Natural Hazards explores the causes and impacts of earthquakes, volcanoes and tsunamis alongside the increasing impacts of extreme weather events.
- The Ecosystems module focuses on tropical rainforests and hot desert climates.

Human topics:

- The topic of Urban Issues and Challenges looks at the problems posed by the increasing urbanisation of the world's population and considers possible solutions.
- In Changing Economic World, students will learn about the variations in quality of life and levels of development in a range of countries including the UK.
- The topics of Resource Management and Water help us understand the challenges in providing enough food, water and energy and the impacts of inequality.

Geographical Skills and Fieldwork:

- Fieldwork is compulsory at GCSE and will take place in at least two contrasting locations. Students will learn to pose enquiry questions, construct robust data collection strategies, present and analyse data and draw conclusions.

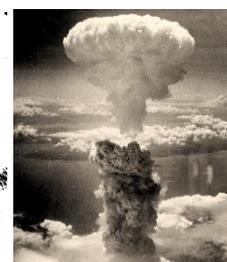

Method of Assessment

This is a linear course and all examinations are taken at the end of Year 11.

Paper 1: Physical Geography -	1 hour 30 minutes	35%
Paper 2: Human Geography -	1 hour 30 minutes	35%
Paper 3: Geographical Skills -	1 hour 15 minutes	30%

HISTORY

Board and Specification followed: Edexcel IGCSE

The IGCSE History course examines some of the key events of the twentieth century, building on what the students studied in Year 9. It is a subject that provokes debate, allows the pupils to form their own judgments and develops key skills such as the critical analysis of source material and essay writing.

Course Outline

The Russian Revolution: our study begins at the court of Tsars and we examine the nature of autocracy and opposition to Tsarist rule. We consider the impact of Rasputin and the First World War and focus on the events of 1917, the year of revolution. We then examine the creation of the Communist State under Lenin and Stalin.

Superpower Relations: this unit focuses on the Cold War that emerged after the Second World War; among the topics we study are the building of the Berlin Wall and the Cuban Missile Crisis.

The final unit will be a breadth study examining themes of change and continuity over time. Pupils will study *China: conflict, crisis and change, 1900-1989*. They will examine the final years of the Qing Dynasty, the descent into the era of warlords, the Chinese Civil War, and the emergence of the Chinese Communist Party. They will then look at the changes implemented under Mao and Deng Xiaoping, socially, culturally, economically, and politically, as China was transformed during the 20th Century. There are cross-curricular links to the Russian and Cold War courses.

In addition to their studies we aim to take Years 10 and 11 pupils on a residential trip and a day trip. In the past we have taken pupils to Normandy, Berlin and to the Imperial War Museum.

Method of Assessment

Two written papers each worth 50%

Paper 1 (90mins) – depth studies

Paper 2 (90mins) – one historical investigation and one breadth study in change

There is no coursework for IGCSE History.

LATIN

Board and Specification followed: OCR Latin (9-1) J282

Course Outline

Pupils will continue to develop their language skills using *Latin to GCSE*, which is an excellent course designed specifically to meet the demands of the new GCSE specification, covering all the language work required and offering a wonderful introduction to Roman mythology and history through the Latin stories.

In the second year of the course, original Latin literature becomes the main focus: you will study two set texts, one in prose and the other in verse. The prose set text will be drawn from Apuleius' *Metamorphoses* and describes the grave dangers posed to travellers by the witches of Thessaly. The verse set text comprises a series of extracts from Book 6 of Virgil's *Aeneid* and describes the Trojan hero Aeneas' perilous journey into the underworld. There he is provided with a vision of Rome's imperial destiny.

Pupils will steadily develop their ability to read and understand Latin texts of increasing complexity, working on translation and comprehension exercises and basic language manipulation exercises. They will read a wide variety of Latin poetry and prose and acquire the skills to analyse these texts critically, as well as discovering the cultural context in which this literature was produced. Latin literature has had an enormous influence on modern, Western literature and culture and the texts set this year provide a wonderful opportunity to consider and discuss themes such as love, loyalty and the role of women.

Method of Assessment

There are three written examinations at the end of the two-year course, with literature and language each worth 50% of the total marks available.

Language (50%)

Candidates are required to translate an unseen Latin passage and answer comprehension questions. There is an option to translate short basic English sentences into Latin or to answer a short section of questions on grammar.

Prose Literature (25%) and Verse Literature (25%)

All literature is studied in class ahead of the examinations. In the examinations themselves, candidates are required to read short passages of Latin and answer comprehension questions as well as translating the text and offering critical evaluation of the passages given.

MUSIC

Board and Specification followed: Edexcel 2MU01

Students may find it useful to know that those who begin this course as a performer of around Grade IV standard can achieve Grade A or better by the end. An understanding of music theory is a definite advantage but it is not essential to have taken the Grade V theory exam.

Course Outline

The aim of this wide-ranging course is to extend musical interests, knowledge and understanding, develop aesthetic sensitivity and cultural awareness and create a foundation for further study. Pupils will study a broad spectrum of music, ranging from Bach to Latin American samba, via film music, fusion and the 20th century musical. Small class sizes allow for a collegiate approach, with free-thinking and stimulating debate encouraged from all participants. Safe in the knowledge that there are few 'wrong answers' in music, we encourage the pupils to immerse themselves in the subject, carrying out their own research in composition and analytical forms.

We have a suite of iMacs which allows all pupils to explore composition using Sibelius and GarageBand for example. Students will be taught to use this software fluently and intuitively, opening doors for study further up the school and for pursuing extra-curricular interests such as orchestration and arrangement. We also encourage students to conduct and direct instrumental and vocal ensembles to build confidence, people skills and stage presence. The course is fun, engaging and taught with a strong practical focus for even the set work studies.

The course is based around four Areas of Study:

1. Instrumental Music 1700-1820
2. Vocal Music
3. Music for Stage and Screen
4. Fusions

Method of Assessment

Coursework is assessed internally and moderated externally. The Listening and Appraising paper is marked by Edexcel.

Paper 1 (30%) – Performance

Pupils must present at least two performances – solo or ensemble - with a total length of at least four minutes duration. Playing at Grade 4 Distinction standard or above would gain full or nearly full marks. Performances can be in any style and on any instrument (including voice)

Paper 2 (30%) – Composition

Two compositions must be submitted. One can be a 'free' composition and one must be in response to a brief set by the exam board. They must be at least three minutes in total.

Paper 3 (40%) – Listening and Appraising

Pupils hear recordings of extracts from the set works and answer questions related to them. These will be in a variety of forms – multiple choice, 'skeleton score' where pupils must fill in missing notes from a passage of music they know well, questions on the wider context of the music and short paragraph questions that test knowledge relating to the 'building blocks' of music.

PHYSICAL EDUCATION

Board and Specification followed: AQA Physical Education

Course Outline

Paper 1: The human body and movement in physical activity and sport

Paper 2: Socio-cultural influences and well-being in physical activity and sport

Non-examination assessment: practical performance in physical activity and sport

- Performance assessment
- Performance analysis assessment

Method of Assessment

THEORY:

Written Paper: 60%. Knowledge and Understanding for the Active Participant

Two written papers:

Paper 1: 30% The human body and movement in physical activity and sport

1hr 15 minutes, 78 marks

Combination of multiple choice, short answers and extended writing questions

Applied anatomy and physiology, movement analysis, physical training and use of data

Paper 2: 30% Socio-cultural influences and well-being in physical activity and sport

1hr 15 minutes, 78 marks

Combination of multiple choice, short answers and extended writing questions

Sport psychology, socio-cultural influences, health, fitness and well-being and use of data

PRACTICAL:

Controlled Assessment: 40%. – 100 marks - The Active Participant.

Pupils are assessed on their ability to perform sporting skills in isolated and competitive situations. There is also an emphasis on the candidate's ability to evaluate and improve their own and others' performances.

Pupils will be assessed in three activities as a player or performer.

One assessment must be in a team sport, one assessment must be in an individual sport and a third can be from either a team or individual sport.

Pupils must be of A team standard in three sports.

Course content includes:

Musculoskeletal system, cardio-respiratory system, levers, planes and axes of movement, components of fitness, principles of training, injury, information processing, mental preparation, social groups, health and fitness, diet and nutrition.

PRODUCT DESIGN

Board and Specification followed: AQA GCSE Design and Technology – 8552

Course Outline

The Product Design course aims to push the boundaries of design thinking while enhancing manufacturing skills. Commercial design is followed when students are able to experiment with a range of practices involving electronic circuitry, vacuum forming, laser cutting, 3D printing and CNC routing to produce inspirational outcomes from a range of resistant materials. All of these opportunities are available at Putney High School. The interactive lessons involve the study of products and their impact in our manmade and natural world. The theory of resistant materials and processes make up an integral part of this course, which provides pupils with a well-grounded understanding of Product Design that will enable them to move seamlessly onto Product Design at A Level should they choose.

Why Study Product Design?

Product Design is at the heart of STEM. It is a technological subject that equips pupils with the essential skills for any future study they might be considering in the fields of Engineering, Architecture or Product Design. During the course, pupils will develop the personal qualities needed to work independently and confidently with a range of resistant materials, tools and machinery including CAD/CAM. Pupils will often set their own targets in the lessons and regularly receive one-to-one guidance on the development of ideas. Pupils have the advantage of leading their learning experience by making personal decisions on the form, function and manufacture of individual design concepts. A range of clubs are available to help pupils engage in the subject at a deeper level or as an opportunity to simply enjoy the design – make process.

Method of Assessment

Principles of Design Technology (50%: 2 hours)

Section A (20 marks) is a multiple choice and short answer exam assessing pupils' breadth of technical knowledge and understanding of all core principles.

Section B (30 marks) involves several short answer questions and one extended response to assess one elective topic taken from the core principles.

Section C (50 marks) comprises a mixture of short answer and extended response questions.

Iterative Design Challenge (50%)

The design challenge requires pupils to respond to one open-ended design brief taken from a range of options set by the exam board in June of Year 10. Pupils will be required research and design an imaginative outcome, they are encouraged to be creative, ambitious and take risks in their work in order to achieve an original and exciting product that allows them access to the higher band of marks in each assessment criteria.

RELIGIOUS STUDIES

Board and Specification followed: Religious Studies Specification A 8062

Course Outline

The GCSE syllabus consists of two papers:

Component 1: The Study of Religions: beliefs teachings and practices

Pupils study the beliefs, teachings and practices of TWO religions and the influences of these on individuals, communities and societies. The two religions studied will be Christianity and Judaism. Different opinions among Christians and Jews as well as non-religious responses to contemporary issues are studied and pupils are encouraged to express their opinions and to develop evaluative skills.

Issues studied include:

- (1) Key beliefs about God and Jesus
- (2) Worship and festivals.
- (3) Covenant and laws
- (4) Family life
- (5) The role of the synagogue and the church

Component 2: Thematic and Textual Studies

- (1) Religion and Life: the origins and value of the universe and human life
- (2) The existence of God and revelation: philosophical arguments for and against the existence of God; the nature of the divine and revelation
- (3) Mark's Gospel: the life of Jesus
- (4) Mark's Gospel as a source of religious, moral and spiritual truths

Method of Assessment

The Examination

Assessment takes the form of two written papers, one for each of the two parts of the syllabus. Each examination is one and a half hours.

Each paper accounts for 50% of the final grade.

There is no coursework for Religious Studies GCSE.

Additional Subjects

PERSONAL, SOCIAL, HEALTH AND ECONOMIC (PSHE) EDUCATION

The PSHE Education course in Years 10 & 11 is based on three core themes of *Health and Wellbeing*, *Relationships*, and *Living in the Wider World*. The course will support pupils, not only during GCSE studies, but in looking ahead to prepare for life beyond school. PSHE education will develop the knowledge, skills, and attributes – often termed ‘character’ – for students to thrive and achieve. These skills and characteristics – such as self-management, empathy, critical thinking, communication, resilience, teamwork and negotiation – are fundamental for happiness and success, both during GCSE studies and in personal and working lives in the future. **As a part of the PHSE programme, students will also be introduced to concepts and tools used by the Positive Group to help them develop resilience and manage their emotions effectively.**

During PSHE lessons students will learn about and respond to a range of different topics, from Physical and Mental Health to Financial Capability and The World of Work; gaining both the emotional intelligence and practical knowledge to manage potential challenges and negotiate choices both now and in the future.

Years 10 & 11 PSHE Topics:

- Positive Psychology & Resilience
- Relationships & Sex
- Tackling Prejudice
- Careers, Money & Finance
- Digital Citizenship
- Global Communities
- Healthy Lifestyles

The course builds on prior learning in PSHE lessons during Years 7 to 9, revisiting some topics in more depth, and introducing new issues to explore. In PSHE in Years 10 and 11, pupils work together to identify, reflect, discuss, debate, and develop opinions and resilient responses to a variety of personal, social, health, and economic aspects of their lives. The course complements and promotes the school’s Wellbeing Programme, and provides students with the intellectual and emotional skills needed to experience both academic success and personal wellbeing, here in school and beyond.

PHYSICAL EDUCATION

Year 10

There are two one-hour lessons of PE in Year 10. This gives all girls the opportunity to participate in a range of different activities throughout the year. Many of these activities are off-site.

Students rotate through the following activities:

Circuit Training	Spinning
Body Pump	Squash
Gym Cardio	Yoga
Zumba	

The Rowing Squad and the U15 Lacrosse teams will train during one of the PE lessons. In the Summer term all girls will participate in Athletics, Tennis and Rounders.

Year 11

There are two one-hour lessons of PE in Year 11. This gives all girls the opportunity to participate in a range of different activities throughout the year. Many of these activities are off-site.

Students rotate through the following activities:

Zumba	Body Pump
TRX Circuits	Gym Cardio
Mixed Martial Arts	Yoga
Spinning	

The Rowing Squad and the Senior Lacrosse teams will train during one of the PE lessons. In the Summer term, all pupils will participate in Tennis and Rounders. This offers a broad and varied programme, building on the sports they have previously learnt but also introducing new sports which can be pursued in adult life.

Extension Activities:

Teams for Years 10 and 11

U16A, U15A&B Netball
1st, 2nd & U15A&B Lacrosse
Gymnastics
Cross Country
Senior Badminton
Rowing*
Athletics
League Tennis
Friendly Tennis
Volleyball

Clubs

Rowing*
Badminton*
Tennis (Tennis Coaching Available*)
Dance*
Athletics
Cross Country

**There is a charge for this activity.*

NOTES

GCSE CHOICES 2020-2022

Name _____

Form _____

GCSE Courses

Compulsory

English
English Literature
Mathematics
Science (3 GCSEs)
Modern Language (chosen from those you have studied
i.e. Chinese Mandarin, French, German, Italian or Spanish)

Choices

Choose any three more subjects from those below

Art	
Chinese Mandarin	Classical Civilisation
Computer Science	Design Technology: Fashion & Textiles
Design Technology: Product Design	Drama
French	Geography
German	History
Italian	Latin
Music	Physical Education
Religious Studies	Spanish

Subjects chosen (we advise that a humanities and a practical subject make a good balance; two modern languages may be chosen):

Modern Language Choice (s) (1 or 2) _____

Other Choices _____

This form should be completed, signed by your parents and returned to your form tutor by **Monday 20th January 2020**.

It is important to note that:

- When numbers are insufficient to form a viable group the subject will not be offered.
- Every effort is made in the timetabling process to allow most combinations of subjects to be chosen, but it is not always possible. We do occasionally, therefore, have to ask students to make alternative choices.
